📍 School of Psychology,
Hainan Normal University,
Haikou (571127), Hainan

Primary Interests

▼ Gender-Typed Traits

Education

LL.B. in Political Science and Administration
Heilongjiang Bayi Agricultural University, Heilongjiang

September 2014 - June 2018

Completed coursework in Principles of Political Science, History of Chinese Political Thought, History of Western Political Thought, Ethics, Jurisprudence, and Civil Procedure Law, among others. Gained an interdisciplinary foundation in political theory, legal reasoning, and administrative governance. Supervised by Assoc. Prof. Xinli Wei.

M.A. in Applied Psychology
Southwest University, Chongqing

September 2018 - June 2021

Completed coursework in Developmental Psychology, Frontiers in Psychology, Advanced Psychological Statistics, Cognitive Neuroscience, Psychological Assessment, and Clinical Interview Techniques, among others. Conducted research on methamphetamine addiction and inhibitory control, exploring the cognitive and neural mechanisms that

Focuses on masculinity and femininity as psychological traits, including the social and developmental factors that influence their formation (e.g., family structure). It also explores psychological and behavioral differences among individuals with varying gender-typed profiles, such as androgynous adolescents.

▼ Human Aggression

Investigates the psychological and biological factors that influence reactive and proactive aggression, as well as potential neural regulation and intervention strategies.

underlie substance use disorders. Supervised by Prof. Jiemin Yang, Prof. Jiajin Yuan, and Prof. Yanling Liu.

Ph.D. in Psychology Southwest University, Chongqing

September 2021 - June 2025

Completed coursework in Advances in Contemporary Psychology, Contemporary Research Methods in Psychology, and Seminar on Personality and Health, among others. Research focuses on the boundary conditions, psychological mechanisms, and neural bases of how gender-typed traits predict reactive and proactive aggression. He is also engaged in developing multivariate predictive models from a holistic perspective. Supervised by Prof. Cody Ding and Prof. Hong Chen.
